

PREPARING FOR INSTALLATION

Existing Can Light: Carefully remove all contents from the carton. Shut off the power at the circuit breaker and remove the cover and bulb from the existing can light fixture (P). Screw the threaded wire connector (B) into the existing socket (A). Remove mounting bracket (F) from adjustable bracket (C, M). Raise adjustable bracket (C, M) to existing fixture (P) to determine placement and adjustment. Adjustable bracket should be inside existing fixture (P) with small tab (Q) at bottom of sides resting against edge of fixture. Secure adjustable bracket (C, M) to insides of existing fixture (P) with screws (D). Reattach mounting bracket (F) to adjustable bracket (C, M) with screws (G, H) adjusting horizontally as needed to ensure opening of existing fixture (P) is covered by new fixture housing (I). Remove screw (R) and take existing ground wire off fixture, placing screw back into the same hole. Loosen screws (N) on mounting bracket (F). Raise fixture housing (I) to mounting bracket (F) and place screws (N) into large side of keyholes (J) and turn clockwise until fixture housing (I) stops. Tighten screws (N) so that fixture housing is not loose but can be removed. Remove fixture housing (I), place LED module (L) inside fixture housing so that screws (K) pass through notches (O). Rotate LED module (L) until it stops against screw (R).

CONNECTING THE WIRES

Have a helper support the fixture's weight while completing the wiring. Attach the fixture's wires to the power supply wires from the junction box. Connect black to black (live) and white to white (neutral). Twist the ends of the wire pairs together then twist on a wire connector. Make sure all twists are in the same direction.

FINISHING THE INSTALLATION

Raise fixture housing (I) to mounting bracket (F) and adjust until screws (N) pass through keyholes (J). Twist entire fixture housing (I) clockwise to lock screws (N) in place. Turn on the power and test the fixture. Your installation is now complete.

CLEANING TIPS

Treat the fixture gently! Regular cleaning will reduce the need for deep cleaning. For regular cleaning, turn off the light and wipe down the fixture with a clean lint-free cotton or microfiber cloth. Never spray cleaner directly onto the fixture.

INSTALLATION INSTRUCTIONS
INSTRUCCIONES DE INSTALACIÓN/ INSTRUCTIONS D'INSTALLATION

WARNING

- To avoid possible electrical shock, before installing your light fixture, disconnect the power by turning off the circuit breakers to the outlet box associated with the wall switch location.
- The lighting fixture must be grounded. If the ground wire for the installation site is not present, immediately **STOP** installation and consult a qualified electrician.
- All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring or in doubt, consult a qualified electrician.

READ AND SAVE THESE INSTRUCTIONS
These instructions are provided for your safety. It is very important that they are read carefully and completely before beginning installation of the lighting fixture.

ADVERTENCIA

- Para evitar una posible descarga eléctrica, antes de instalar su lámpara, desconecte la energía apagando los interruptores automáticos (breakers) que alimentan la caja de salida asociada con la ubicación del interruptor de pared.
- La lámpara se debe conectar a tierra. Si el alambre de conexión a tierra no está presente en el sitio de la instalación, **DETENGA** inmediatamente la instalación y consulte con un electricista calificado.
- Todo el cableado debe realizarse de acuerdo con los códigos eléctricos locales y nacionales ANSI/NFPA 70. Si no está familiarizado con el cableado, o si tiene duda, consulte a un electricista calificado.

LEA Y GUARDE ESTAS INSTRUCCIONES
Estas instrucciones se proporcionan para su seguridad. Es muy importante leerlas detenidamente y completamente antes de comenzar la instalación de la lámpara.

AVERTISSEMENT

- Pour éviter tout choc électrique, avant d'installer le luminaire, coupez le courant en éteignant les disjoncteurs de la boîte électrique associée à l'interrupteur mural.
- Le luminaire doit être mis à la terre. Si le fil de terre du lieu d'installation n'est pas présent, **ARRÊTER** immédiatement l'installation et consulter un électricien qualifié.
- Tout le câblage doit être conforme aux codes électriques nationaux et locaux en vigueur et à la norme ANSI/NFPA 70. Si vous n'avez pas l'habitude de faire ce câblage ou en cas de doute, adressez-vous à un électricien qualifié.

LISEZ ET CONSERVEZ CES INSTRUCTIONS
Ces instructions sont fournies pour votre sécurité. Il est très important de les lire attentivement dans leur intégralité avant d'entreprendre l'installation du luminaire.
